Firefox clear cache

1. Click the menu button  and select Options.
2. Select the Privacy & Security panel.
3. In the Cookies and Site Data section, click Clear Data.
4. Remove the check mark in front of Cookies and Site Data.
5. With Cached Web Content check marked, click the Clear button.
6. Close the about:preferences page. Any changes you've made will automatically be saved.

Tip: Here's another way to clear the Firefox cache:

Click the Library button , click History and click Clear Recent History.... Next to Time range to clear, choose Everything from the drop-down menu, select Cache in the items list, make sure other items you want to keep are not selected and then click the Clear Now button.
Chrome clear cache

Computer:

In Chrome

1. On your computer, open Chrome.
2. At the top right, click More.
3. Click More tools > Clear browsing data.
4. At the top, choose a time range. To delete everything, select All time.
5. Next to "Cookies and other site data" and "Cached images and files," check the boxes.
6. Click Clear data.

Android

In the Chrome app

1. On your Android phone or tablet, open the Chrome app.
2. At the top right, tap More.
3. Tap History > Clear browsing data.
4. At the top, choose a time range. To delete everything, select All time.
5. Next to "Cookies and site data" and "Cached images and files," check the boxes.
6. Tap Clear data.

Before clearing cache & cookies

When you clear your cache and cookies, your browser might sign you out of your Google Account.

In the Chrome app

1. On your iPhone or iPad, open the Chrome app.
2. At the bottom, tap More.
3. Tap History > Clear browsing data.
4. Make sure there’s a check mark next to "Cookies, Site Data," and "Cached Images and Files."
5. Tap Clear browsing data.
Safari clear cache

1. Click on the Safari tab at the top right of your screen and choose Preferences from the dropdown menu.

2. Click the Advanced tab of the menu that pops up.

3. At the end of the tab, select the "Show Develop menu in menu bar" box and close the Preferences menu.
4. Click the **Develop** tab from the Safari menu at the top of the page.

5. Click **Empty Caches** from the dropdown menu.
You may also want to clear your browsing history in addition to emptying your cache. Here's how to do that.

1. Choose the **History** tab in Safari (pictured above).

2. At the very bottom of the dropdown menu, choose **Clear History**.

3. A box pops up with a choice to clear the last hour, today, today and yesterday, or all history. Choose your time frame and click the **Clear History** button.

![Clearing history will remove related cookies and other website data.](image)

If you're not sure how far back you want to clear your of your browsing data, err on the side of clearing less. You can always go back and clear out more later.

Any tabs you have open at the time you clear your browsing history will remain. You may notice that the Frequently Visited section no longer appears when you open a new tab. As you build up your browsing history again, those sites will reappear.

**How to clear the Safari cache on iPhone, iPad, or iPod**

You have two choices to clear your cache on Safari's mobile app.

To clear your entire browsing history and cache:

1. Open the **Settings** app.

2. Tap **Safari**.

3. Tap **Clear History and Website Data**.
Clear History and Website Data
4. On the screen that pops up, choose **Clear History and Data**. Note that, when you clear your cache on your iPhone or iPad, it will clear your history on your connected devices and computers as well.
Clearing will remove history, cookies, and other browsing data.

History will be cleared from devices signed into your iCloud account.

Clear History and Data

Cancel
To clear your cookies but not your browsing history:

1. Open the Settings app.
2. Tap Safari.
3. Tap Advanced.
4. Tap Website Data.
5. Choose **Remove All Website Data**.

Show All Sites

Remove All Website Data
Before you do this, you might want to check your iCloud settings (see below) to make sure you preserve your passwords.

**What happens to saved passwords when you clear your cache**

You may have had the experience of clearing your browsing history and cache and then discovering that your browser logged you out of your favorite websites. If you saved passwords in your browser so you could automatically log in to certain sites, clearing your cache can clear your passwords as well.

Happily, Apple has a solution to this problem. If you use iCloud, check your iCloud settings on your phone or computer. Make sure that you've checked the box for Safari.
Make sure the Safari box is on under iCloud to retain your passwords in your keychain. Laura McCamy/Business Insider

As long as this box is checked, any passwords you save through your browser will stay safe in your keychain.
